- 2004 A new corporate structure created due to the organizational reshaping
- 2006 Awarded "Bank of the Year 2006" for Taiwan by The Banker, ISO 27001 Certificate from BSI

Message to Our Shareholders

Michael C. S. Chang Chairman of the Board

Business Report for 2006

Overview of Financial Industry of Taiwan Thanks to stable economic expansion in the major countries and the drop in international oil prices, the global economy in 2006 not only surpassed its 2005 performance to grow at a rate of 5.1% but inflationary risk was also kept well within control. Although domestic demand in Taiwan weakened a little because of card-debt problems and the unclear prospects for cross-straits development, external trade performed brilliantly and, with macroeconomic performance in an "externally hot and internally cold" situation, economic growth for the year as a whole reached 4.62%. In this environment the amount outstanding loans by major financial institutions at the end of the year was up only 2.44% compared with the end of 2005, the smallest growth in five years. Vigorous efforts to write off bad loans and allocate reserves brought the nonperforming loan (NPL) ratio in the banking system down to 2.13% and boosted the ratio of NPL coverage to 58.83%. Both of these figures were the best since 2001, showing that operating risk in Taiwan's banking system has declined and asset quality has improved.

Domestic interest rates experienced a slow rise in 2006, with continuous hikes by the Central Bank bringing the overnight call rate to 1.69% at the end of December and the annual average to 1.56%, an increase of 25 bps over a year earlier. Overall, however, the supply of funds in the monetary market remained loose; because of this factor, plus intense competition in the banking industry, the spread between deposit and loan interest rates narrowed from 2.17% at the end of 2005 to 1.77% at the end of 2006. Bank earnings plummeted during the year because the shrinking interest-rate spread eroded profits and because of the aggressive write-off of card debt or increased allocation of reserves by banks that focused on consumer banking. The latest information from the Financial Supervisory Commission puts the 2006 before-tax losses of domestic banks at

NT\$7.42 billion; return on equity (ROE) dropped from 4.81% in 2005 to -0.43% in 2006, while return on assets (ROA) fell from 0.30% to -0.03%. This was the lowest profitability since 2002, when huge write-offs of bad debt, in order to reduce their NPL ratios, caused an annual loss of NT\$104.6 billion.

Thanks to the support of our clients and shareholders, plus the efforts of all our employees, the Bank bucked the generally poor profit performance of Taiwanese banks in 2006 and, even in such a tough financial environment, reached its budget target and turned in a before-tax profit of NT\$13.694 billion. This performance has been acknowledged by winning a highly respected global award "Bank of the Year 2006" for Taiwan from *The Banker* magazine, a unit of the Financial Times Group in England. Following are descriptions of the Bank's organizational restructuring, results of operating strategies, budget implementation, income and expenditure, and research & development in 2006:

Organizational Restructuring

The Bank carried out an overall organizational restructuring in 2006, retaining the advantages of the business unit framework and picking out the superiority of the original branch system, further heightening the function of branch managers, and unifying responsibility for the operating performance of branches so as to fully leverage the sales channel advantage of the Bank's existing branch units; strengthening solidarity, cooperation, and lateral communication, and providing good customer services that make customers satisfied with the Bank's good and considerate service. In doing this we will assure that there is no compromise on service and will create a win-win-win situation for our customers, employees, and shareholders alike.

Performance of the Bank

Performance of Operating Strategies

Products innovation

The Bank developed "Trusteeship Service for Securitization", participated in the underwriting of the "First OTC International Bond", undertook "Compulsory Trusteeship of the Property of High-ranking Officials of the Executive Yuan and Its Subsidiary Agencies", and other products; inaugurated the "Platinum Business Card", "Preferential Loans for Distribution Services", "Investment Loans for Returning Taiwanese", "Online Financing Service for the Formosa Plastics Network", "Loans for Own-brand Promotion in Overseas Markets", "Bulk Payments for Vietnamese Workers" and other new products; actively pursued the opportunity to be the Mandated Lead Arranger (MLA) for syndicated loans; and expanded the marketing of financial products, thus increasing the Bank's fee income.

Reinforcing Internet banking functions and upgrading information quality In response to the ubiquitous nature of the Internet and to provide convenience for customers, the Corporate E- Banking has been completely upgraded and the payment of foreign-currency funds via the Internet bank added to its functions. In addition, the Bank has won ISO 27001 information security certification from BSI of the U.K., propelling it toward the new international age of information security.

Deployment of domestic and overseas bases and development of crossstraits businesses An overall reinforcement of domestic and overseas branch networks has been carried out. Within Taiwan, the Bank relocated offices taken over from farmers' and fishermen's associations and established them as the Kao-Ko, Yung-Kang, Nan-Tun, Chin-Hua, Dan-Shui, and Lin-Kou branches. Overseas, applications were submitted for the establishment of Toronto Branch and Brisbane Branch, and for the upgrading of the Hanoi Representative Office to branch status. This made the Bank's domestic and overseas branch networks even more comprehensive and enabled it to serve its customers better. In response to the booming development of economic and trade ties across the Taiwan Straits, the Bank is vigorously promoting the loan and wealth management business in the Greater China area and building up a closely knit service network made up of Hong Kong Branch, Shanghai Representative Office, Offshore Banking Branch, and domestic branches, and is integrating and expanding its cross-straits marketing team for the all-out promotion of business in the Greater China.

Introduction of a new account-settlement system

The simplification project of a new branch account-settlement system was completed in 2006, not only enhancing the efficiency and quality of account settlement by branches, but also reinforcing internal controls while, at the same time, providing a good foundation for follow-up analysis of operating performance and benefiting the overall operating efficiency.

Strengthening of risk control

To comply with the risk management demands of Basel II, credit, market, and operational risk management tools were continuously developed to further strengthen the monitoring and management of different kinds of risk. The Bank suffered only a slight impact from the cash- and credit-card turmoil that has confronted the banking industry in the past two years. The Bank's NPL ratio at the end of 2006 was only 1.57% and coverage ratio was 52.15%, indicating that its assets quality is better than the average in the banking industry.

Market research

In response to the rapid changes taking place in domestic and international economic and financial conditions, and to meet the needs of business development, in 2006 the Bank directed its research mainly in the direction of forecasting and analysis of economic,

financial, and industrial conditions, the potential impact of changes in domestic and overseas financial regulations, and trends in the development of new types of financial products and businesses. The results of this research have been disseminated to related organizations and to all the Bank's employees via video and the Internet.

Budget Implementation, Growth and Profitability

- ► The average deposits were NT\$1,144,124 million, a target of 100.08% and an increase of NT\$41,100 million over 2005 or a growth of 3.73%.
- ► The average loans were NT\$893,500 million, a target of 98.72% and an increase of NT\$64,388 million from 2005 or a growth of 7.77%.
- ► The foreign trade finance totaled US\$178,543 million, and an achievement of 99.91%, this amount was up US\$4,589 million over 2005 or a growth of 2.64%.
- ▶ The sale of non-discretionary trust of money, including domestic and offshore funds, collective management account plus foreign securities reached NT\$239,779 million, an achievement of 91.34% and an increase of NT\$16,360 million over 2005, a growth of 7.32%.
- ► Custody of funds amounted to NT\$276,573 million, reached a target of 79.75%, an increase of NT\$16,596 million over 2005 or a growth of 6.38%.
- ► Revenues and expenses totaled respectively NT\$56,009 million and NT\$42,315 million, yielding a pre-tax income of NT\$13,694 million.

Business Plans for 2007

The global economy will continue to grow stably in 2007 and Taiwan's domestic economy will remain in a state of expansion, with growth for the year expected to over 4%. Foreign equity investment in Taiwan and the outward migration of Taiwanese industries are expected to heat up competition in the banking industry, but a rise in profitability is anticipated following the improvement of asset quality and the gradual subsiding of the cash- and credit-card crisis. The Bank's organizational restructuring has taken effect; and besides, striving to optimize business processes and establish a performance orientation with a "customer-first" service culture, during this new year, the Bank will place the emphasis of its operations on the development of business in the Greater China area, syndicated loans, wealth management, and the marketing of financial products. In the face of the intensely competitive market environment, we will not only offer a full spectrum of financial services but will also continue enhancing our risk management and internal control capabilities, and consolidating our existing high-quality assets, so as to reach our budget targets for the year of NT\$1,200,631 million in average outstanding deposits and NT\$966,511 million in outstanding loans.

Future Development Strategies

To assure the achievement of these targets, our development strategies and key operating directions for the year are as follows:

▶ Integration of the resources of the First Financial Holding Co. and full application of the Bank's marketing-channel advantage to vigorously carry out cross-marketing and enhance product penetration.

Economic Outlook and Business Targets

- ▶ Use of Hong Kong as an outpost and a springboard for the development of crossstraits business opportunities, and devotion of full efforts to the development of wealth management, and providing composited financing for offshore companies in the Greater China area, so as to strengthen services to Taiwanese businesses overseas.
- Overall heightening of business volume and market share for key products, with special emphasis on the marketing of syndicated loans, foreign exchange, wealth management, and financial products, and boosting of the ratio of commission fee income.
- ► Active establishment of strategic alliances with high-quality financial institutions, and enhancement of the Bank's product design capabilities and marketing skills.
- Continued readjustment and deployment of domestic and overseas branch units so as to serve as a model for Taiwan's banking industry and as the ideal financial partner for Taiwanese companies all over the world.
- Reinforcement of the risk management mechanism and maintenance of a low NPL ratio and high coverage ratio.
- Continued optimization of working processes so as to release back-office personnel, and strengthening of professional training to enable them to switch to front-office sales jobs.
- ► Thorough monitoring of expense-budget implementation so as to lower operating costs bank-wide.
- Continued heightening of the ratio of demand deposits and strengthened sale of investment products so as to lower capital costs throughout the Bank.
- Continued establishment of the Basel II risk management mechanism so as to maintain the quality of the Bank's assets.

Influence of the Financial Industry

The Sector Environment

The share of assets held by Taiwan's five largest banks is still less than 40% of the total assets in the banking system as a whole, and there is concern about having too many banks. This situation is exacerbated by the very high degree of similarity in the products and services offered by the different banks; this leads to price competition, which in turn brings about a continuous shrinkage of the spread between deposit and loan interest rates. Since interest income is still the main source of revenue for Taiwan banks, this makes it difficult to boost profits. Whether or not the banks will be able to improve their profit performance in the future will be determined by the extent of their demand for asset quality and their success at adjusting the structure of their operating revenues. In view of this situation, the Bank is striving to readjust the structure of its operating revenues; and last year, by strengthening the development of wealth management and the marketing of financial products, we achieved an 18% growth in commission fee income. This year we will continue our focus on these key businesses in order to create more non-interest income.

The New Basel Capital Accord is becoming effective in 2007, with a large-scale adoption of quantitative calculation models and a clearer calculation of risk. This is expected, through appropriate risk control and the lowering of capital costs, to expand the flexibility and the dimensions of banking operations. Once the banks have an objective capability for differentiation, they will be able to escape price competition and strengthen their competitiveness; the strength or weakness of a bank will also become increasingly apparent, and those with poor quality will face the pressure of acquisition and this will become an indirect force for consolidation. The Bank is already working on its conformance with the New Basel Capital Accord; this entails boosted investment in R&D, but in the future it will upgrade risk-control capability and facilitate the improvement of profitability. At the same time, the Bank will thoroughly optimize its risk-management mechanism with the aim of achieving the target of strengthened competitiveness.

The Macroeconomic

Environment

The Regulatory
Environment

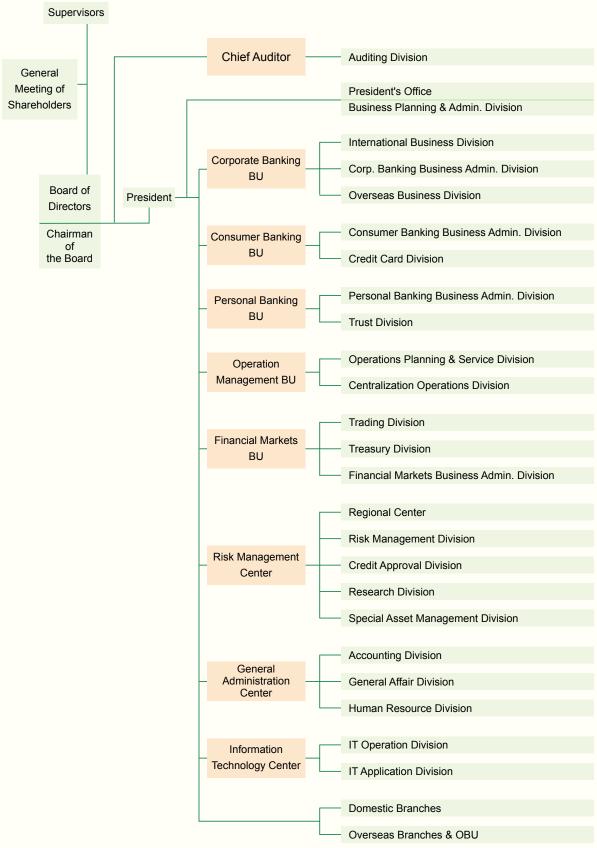

Domestic and international economic performance is expected to remain steady in 2007; but domestic corporate investment intention is not strong, so the growth in loans will be limited. Signs of overheating have appeared in the real estate market recently, leading operators to turn toward a greater emphasis on the control of quality; for this reason, growth in the construction financing and home loan businesses may be slow in comparison with the past. Further, the attitude of bankers toward the extension of unsecured consumer loans will likely continue to be conservative due to the impact of the card-debt turmoil. To sum up the above, the overall scale of loan extension by banks is expected to expand only moderately this year. In fact the Bank began viewing the overseas loan business as a new profit engine last year, and the ratio of before-tax profit contributed by overseas branches has already surpassed 20%. The effort to strengthen the development of overseas businesses, including international syndicated loans and business in the Greater China area, will continue this year.

Credit-rating Results

Rating Institution	Published Date	LT	ST	Outlook
Taiwan Ratings Co.	June 26, 2006	twAA-	twA-1	Stable
Fitch	November 30, 2006	BBB+	F2	Stable
Moody's	October 31, 2006	A3	P-1	Stable
Standard & Poor's	June 26, 2006	BBB+	A-2	Stable

In the new year we will continue placing emphasis on the development of key businesses, on product innovation, on customer satisfaction, and on the upgrading of operating quality with the aim of continuing to increase the Bank's profitability and expand asset scale and market share in 2007. Our objective is to become a model for Taiwan's banking industry and the most competitive international bank serving Chinese communities, and to continue creating sustainable value that is shared by our shareholders, customers, and employees alike.

Market Analysis

Multinational Network The Bank, century-old, is a large bank with a rich native feature of Taiwan, and the pace of its internationalization has accelerated along with the outward extension of the island's economic power. At the end of 2006, the Bank had 188 branches country-wide as well as 20 business locations in major International financial centers such as London, New York, Tokyo, Hong Kong, Singapore, and the Southeast Asian countries that have had such strong potential for development in recent years. The Bank derived 20% of its profit from overseas branches in 2006.

The Supply Side

Future Market Supply, Demand and Growth Because of the difficulty of pushing forward of financial consolidation in Taiwan, the increasingly narrow interest margin brought on by excessive competition among banks is not easy to change, and price-cutting competition among local banks is becoming fiercer by the day due to their high ratio of product similarity. Moreover, it shows that the acquisition of small- and medium-sized local banks by foreign financial institutions is becoming more active, helping those banks to become the major market force in providing personal wealth management services to those at the top of the economic pyramid and financial products to Taiwanese businesses around the world.

The Demand Side

The cash- and credit-card turmoil has led to a substantial reduction in the demand for consumer financial products, but the development of Taiwan's economy over the past 50 years has created a group of people whose wealth has accumulated rapidly and who have become affluent because of rising land prices and increasing stock values. Further, domestic interest rates have been low for years, leading to a constantly increasing demand for the sending of capital abroad in search of higher returns. Because of these factors, the provision for clients with a service platform for investment consultation, tax planning, and asset management products has become a key development strategy for just about all banks in Taiwan.

In the area of corporate finance, the global deployment of domestic productive enterprises for the purpose of enhancing competitiveness has long since become a trend, and the locomotive force for domestic economic growth has gradually diversified from manufacturing into telecommunications services, shipping and warehousing, biotechnology, software design, digital content, and other creative industries. Besides pursuing ways to keep up with the pace of these Taiwanese enterprises by providing financial products to satisfy their demand for short- and long-term capital both at home and abroad, the domestic banking industry needs to break away from its traditional emphasis on the model of credit extension secured by tangible collateral and design a new loan framework that will enable them to grasp the flow of funds and goods, and to take advantage of opportunities in this new type of business.

Competitive Niche, Favorable and Unfavorable Factors in Development Prospects, and Responsive Measures A widespread network of business locations, large number of customers, and a century-long heritage of stable operation are competitive advantages of the Bank that are clear to everybody. Within the rapidly changing external operating environment, however, in its development over the long term, the Bank may meet with the following circumstances:

Favorable Factors

- The write-off of bad loans over the past several years has brought a major improvement in the transparency of asset quality; and with strict examination by risk control units, the Bank should be possible to maintain asset quality in the future.
- The implementation of the New Basel Capital Agreement will highlight the operating value of banks that emphasize risk management; when the Bank's use of risk management tools becomes mature, therefore, the Bank will become more nimble in its product pricing strategy and be able to reduce its allocation of reserves as well as calculate the performance of each unit more accurately. This will boost the Bank's competitiveness to a higher level.
- After privatized, the Bank has been able to recruit outstanding personnel from top domestic and foreign schools every year. Those capable staff equipped with the latest professional financial know-how plus in infusion of the Bank's superior tradition will surely become a vanguard of its operation moving forward toward the aim of "transcends competition and opens new horizons".

Unfavorable Factors

- Many uncertainties remain on Taiwan's financial reform, and the excessive competition in the banking industry is unlikely to see any improvement within the next few years.
- Mainland China is one of the main destinations for overseas deployment by Taiwanese enterprises; but in political relations no model for cross-straits interaction has been established, and this inevitably constricts the room in which domestic banks have for development.

Responsive Measures

While the Bank's operations cannot avoid being influenced by the above-mentioned factors, the following responsive measures have been formulated:

- Enhancing the conventional products of SMEs loans, foreign exchange, and trust businesses.
- Expansion of the scope of joint marketing under the financial holding company framework.
- Startup of four major profit engines under the frame of Business Unit: domestic and international syndicated loans, the Greater China market business, the financial marketing business, and the wealth management business.

Business Plans for 2007

Corporate Banking BU

The ideal financial advisor for Taiwanese businesses throughout the world, and a leading Taiwanese bank in the international syndicated loan business

- The sales of high-profit and high-commission products will be introduced and performance in the utilization of resources enhanced, particularly in areas of factoring, foreign exchange, and syndicated loans.
- The Bank will use the advantages of the domestic and overseas channels, and its vast customer base to focus on Taiwanese businesses in the Greater China area, so as to expand business opportunities in the foreign exchange and derivatives businesses.
- The Bank aims to regain its position as top of Taiwan's "Big Three" commercial banks in the loan business.
- The Bank will target Taiwanese businesses in Taiwan, Hong Kong, and mainland China in deepening its customer relationships.
- Self-compensating financing will be the main focus among different loan products; and loans' quantity and quality will be equally emphasized.
- The information systems of domestic and overseas branches will be integrated for the provision of global funds-flow services.

Consumer Banking BU

Provision of service to the ends of the earth; reinforcement of channel value; achievement of a compound annual growth rate of over 6% for the coming three years

- At least two core products will be developed or improved each year.
- Image entry and new consumer e-Loan systems will be completed.
- Brand-building and advanced CRM techniques will be used to implement marketing programs.
- Various consumer-loan products will be promoted by life-cycle marketing.

Personal Banking BU

Personal wealth-management services will be developed and a market-leading position will be established for the "First Wealth Management" brand, so that the Bank will come to be recognized as the leader in wealth management.

- Primary customer-base positioning: High-net-worth VIP financial-management customers will be cultivated.
- Expansion of the financial-management base: The customer base will be deepened and the number of clients will be increased.
- Customer differentiation management: All-segment customer services will be provided and differentiated marketing will be carried out.
- Product strategic alliances: The asset management business and the market of Hong Kong will be developed.
- Expansion of domestic and overseas markets: The FCB's domestic market position will be consolidated and business opportunities in the Greater China area developed.
- Adjustment of the income structure: Equal emphasis will be given to "trading commissions" and "account balance management fees".

Operation Management BU

An outstanding service platform will be built up, helping to make it Taiwan's most convenient and reliable bank.

- Close cooperation with different Business Units will be used to manifest the team spirit in expanding the scale of demand deposits as a means of reducing capital costs.
- Time-deposits customers will be shifted to invest in financial-management products so as to increase sources of commission income.
- A complete product and channel network will be established, customized products will be designed, marketing channels will be expanded, professional personnel training will be strengthened, and business opportunities will be created so as to achieve a win-win situation for the Bank and its customers.
- Centralized operations such as image file management and blank-check production will be completed.
- Electronic channels such as PDA and MOD will be developed.

Financial Markets BU

A financial products developer

- A derivative product system model will be developed so as to enhance the Bank's product-developing ability and improve profit margins.
- The investment and R&D resources of the First Financial Holding Company will be shared in the upgrading of income from securities investment.
- A financial product marketing channel will be established by using branch network so as to provide customers with a full spectrum of financial products and services.
- The Hong Kong Branch will be used as a bridgehead for the build-up of a marketing network in the Greater China area.
- Financial engineering and the electronic trading platform will be used to enhance the return on financial products designed.
- Multiple channels will be applied to cultivate financial product trading and sales personnel.

Corporate Governance

Item	Operation	Deficiency with the Corporate Governance Best-Practice Principles for Banks, and the Reasons
Ownership Structure and Shareholders' Equity		
 the handling of shareholders' suggestions and disputes updating the details of major shareholders of controlling stake in the bank risk assessment and firewalls established against the operations with the affiliates 	 The Bank's sole shareholder is First Financial Holding Co.; communication channels are open. The bank is owned by a single shareholder, and the structure is quite simple. The subject matters are governed by "The Rule for Personnel, Information and Business Exchanges between First Commercial Bank and its Investee Companies". 	fully compliant
B. Organization and Responsibilities of the Board of Directors		
establishing independent director(s) evaluating the independence of the CPAs periodically	None When the Bank employs CPAs to audit financial condition and tax filing each year, it will seek independent statement from the auditor and submits the commissioning of the auditor to the Board of Directors for approval.	subject to the implementation of relevant laws and regulations fully compliant
C. Organization and Responsibilities of Supervisors		
 establishing independent supervisors communications with supervisors by 	 It is not required following the revised regulation. The Bank has one standing supervisor, representing all supervisors to work in the office, and designates staff member to handle the related contact matters. The communications with standing supervisor or other supervisors by bank employees and the interested parties are open. 	fully compliant
D. Communications with Interested Parties		
	 To protect the interests of customers, the Bank has established "The Consumer Protection Principles and Implementation Guidelines for First Commercial Bank" and has set up a customer feedback hotline and external website, providing for open communication with the interested parties. The Bank's internal website contains a discussion forum and bank-wide videoconferences are held regularly, providing for open communication with employees. 	fully compliant

ltem	Operation	Deficiency with the Corporate Governance Best-Practice Principles for Banks, and the Reasons
E. Disclosure of Information		
setting up a website use of other methods	 Annual report, major financial statements and corporate governance are publicized on the Bank's website. The Bank has set up an English website, where Annual Report, and monthly financial information, etc. are available. A spokesperson system has also been established; Mr. Po-Chiao Chou, EVP is appointed spokesperson. 	fully compliant
F. Operation Status of the Nomination or Remuneration Committee	None	subject to the implementation of relevant laws and regulations

G. Description of the Bank's Corporate Governance (including its deficiency with the Corporate Governance Best-Practice Principles for Banks, and the reasons):

All are disclosed as above.

H. Please describe the systems and measures adopted by the Bank in regard to social responsibility (including human rights, employee rights, environmental protection, community participation, supplier relations, monitoring, and material relationship rights), and its implementation of social responsibility:

The Bank has requited the society in recent years with sponsoring numerous cultural and sports activities. It has also provided large scholarships to encourage learning, and has held numerous quality lectures as well as art performances. Together with First Financial Holding Co., the Bank sponsored a charity fair for the public interest to demonstrate its corporate social responsibility. These activities will continue to be organized in the future.

I. Other Information

- Continuing education of directors and supervisors:
 In addition to offering opportunities of advanced education in accordance with the individual wishes of directors, the Bank also provides the relevant information of continuing education programs for their reference.
- Attendance of directors and supervisors at the Board meetings:
 They prepared well to attend the meetings, and provided sufficient and valuable opinions at appropriate times.
- Abstaining from the meetings involving director's or supervisor's own interest:
 They exercised a high degree of self-discipline to withdraw from the proposal discussion, in order to avoid the conflict of interest as regulated by "The Guideline for the Board of Directors Meetings of First Commercial Bank".
- Risk control policy and implementation: The Bank has established a risk management policy and has set up a mechanism for risk identification, risk assessment, risk oversight and risk control via a management system with an integrated framework. The Risk Management Committee is in charge of risk review, risk oversight and coordination of all risk related business activities. The primary goal of a consolidated risk management system, adopting a risk-centric approach business
- operating policy, is to achieve business targets in order to maximize shareholder returns.
 Consumer-protection policy:
 The Bank has set up "The Consumer Protection Principles and Implementation Guidelines for First Commercial Bank" to assure that consumer interests are protected.

Risk Management Overview

Risk Governance

"The Risk Management Policy" has been established in accordance with the governance structure of "The Risk Management Policy and Guiding Principles for the First Financial Holding Company", the operating strategies of the Bank, and the relevant laws and regulations of the competent authorities in Taiwan.

The Board of Directors: the highest level of risk management oversight.

The Risk Management Committee: reviews risk-related proposals bank-wide, risk management system, risk exposures and limits of authorization, etc.

The Risk Management Center: consists of four divisions and six regional centers; in charge of credit risk, market risk, operational risk and integrated risk.

Risk Measurement, Control and Disclosure

Credit Risk

Strategy and Process

Various internal and external modeling techniques for the scoring and rating of credit risk are gradually being introduced in order to quantify credit risk within the Banks' risk tolerance, and establish objective review standards that conform to the implementation of Basel II. On line credit scoring tools are available for the products of corporate banking, credit cards and mortgages.

Risk Assessment and Reporting

In making credit decisions, a number of factors are considered. We set concentration limits for "a person", "a related person" and "a related enterprise", and the guidelines for "loans by borrower", "loans by conglomerate", "loans by country" and "loans by stocks", etc. The relevant credit risk analysis reports have to be submitted to the Risk Management Committee and the Board of Directors for their reviews regularly. For credit-rating products, their implementation of rating policy and category of customer's rating score have to be submitted to the Risk Management Committee periodically.

Risk Exposure

Risk assets of on-balance sheet December 31, 2006

Loans by counterparty	Risk weight	NT\$,000
Central government	0%	0
Local governments	10%	3,044,455
Domestic banks	20%	33,243,685
Residential mortgages	50%	148,768,382
Others	100%	625,403,523
Total		810,460,045

Risk assets of off-balance sheet December 31, 2006

Item	NT\$,000
Off-balance sheet transactions	52,967,286
Derivative financial instruments	3,280,339
Bills and bonds payable under repurchase agreements (RP)	219,470
Investments in bills and bonds under resale agreements (RS)	828
Total	56,467,923

Risk-hedging Strategy

The excessive concentration of transactions in similar trading products and with the same counterparty is avoided. In addition, respective tools will be taken in managing trading positions and limits of hedging derivate contracts, and in risk evaluation.

Market Risk

Strategy and Process

- Risk management units and business operating lines maintain independence.
- Various market indices and limits are established, and are updated subject to market changes.
- Management methods and monitoring procedures are established in accordance with the nature and characteristics of each specific product.
- The market risk reports are regularly reviewed by the Board of Directors or high-level managers to effectively control risk exposure and adjust risk management policy at appropriate time.

Risk Assessment and Reporting

- Assets and derivative products on or off the balance sheet are at risk of potential losses caused by unfavorable changes in market prices. The "market price" referred to encompasses interest rate, equity, foreign exchange rate, and commodity price, etc.
- The risk-measuring tools of VaR and Greeks are employed to evaluate risk exposure.
- The market risk reports will themselves present the extent of risk exposure, and be used as references by the management executives to timely adjust the risk control policy.

Risk-hedging Strategy

The trading positions of financial products dealt with customers will be properly hedged or squared, and some will be held as risk assets within adequate risk tolerance. The hedging financial dereviates primarily encompass interest rate swaps, cross-currency swaps, options, and interest caps or floors, etc. The fixed-rate loan assets conducted by overseas branches will utilize interest rate swaps to mitigate the fair value risk.

Risk Exposure

The market risk exposures, and the capital charges measured by the standardized approach as of December 31, 2006

Risk type	Capital charge (in NT\$,000)	Risk assets (in NT\$,000)
Interest rate risk	900,996	11,262,450
Equity position risk	404,043	5,050,538
Foreign exchange risk	465,141	5,814,263
Commodity risk	0	0
Treatment of option	663,746	8,296,825
Total	2,433,926	30,424,076

Operational Risk

Strategy and Process

- Predictable and unpredictable operating losses are differentiated and established.
- When errors occur, improvements should be made immediately so that the errors will not be repeated or enlarged.
- A good risk management culture and environment will be built up.
- Each employee at different levels should be responsible for the operational risk of their own job scope so as to establish an effective internal control system.
- All the Bank's operations should conform to internal control and auditing policy, and relevant guidelines.

System Organization and Structure

- The Banks adopts centralized management approach to manage the operational risk and appoints operational supervisors to manage the risk.
- The top risk management officer is Executive Vice President of Risk Management Center and each department's compliance officer is also responsible for operational risk management.

Risk Assessment and Reporting

- Identification and evaluation of the categories, causes, and forms of potential losses by products, activities, process and operational system.
- Identification of operational risk by the standard operating methods.
- Continued follow-up and improvement carried out for different links in the chain of risk.
- Risk control reports are submitted to management levels on a scheduled basis.
- An executive in charge of risk reporting and policy guidance by the respective unit.

Risk-hedging Strategy

- Preparation of the emergency back-up facilities and a business continuity planning process.
- Submission of crisis management reports to the Risk Management Committee on an unscheduled basis.

Liquidity Management

To protect the interests of customers and maintain an appropriate level of liquidity, the Bank has appropriated deposit reserves and liquidity reserves in accordance with the rules established by the Central Bank. Sources and allocation of capital are handled on the principles of diversification and stability. In the utilization of capital excessive concentration is avoided, and the principles in holding assets have to meet the nature of liquidity and profits-generating. When necessary, the Bank may use such liabilities management tools as call loans from other banks, swap transactions and the issuance of negotiable certificates of deposit or applying for financing from the Central Bank to manage liquidity gap.

Corporate Responsibility and Ethical Behavior

Based on the concept of fulfilling its corporate responsibility, the Bank spares no effort in the sponsorship of publicbenefit activities.

- The First Education Foundation This Foundation has continued the implementation of targeting the promotion of social harmony and carried out social-benefit activities on an ever-larger scale.
 - ► In March of 2006, it held a Spring Dawn Concert in the Kuo-Kwang Conference Hall of the Chinese Petroleum Corp. in Taipei.
 - ► In November, it held a historic site tour named as Hundred Years of Red-Hair Fort at Huwei.
 - ► In December, it organized four lectures entitled Revitalize Life for participation by the public.
- Charity Activities for the Blind In September 2006, we held the 2006 First Financial Group Garden Party -Take Care of Eyes, Care for the Blind, Love First, contributing its social concern to the Cultural and Educational Foundation for the Blind, ORBIS Taiwan, and Taiwan Guide Dog Association.
- Community Involvement In November 2006, all employees were urged to get outside and take part in mountain climbing and cleanup activities so as to give the nature a clean space in which to live.
- Customer Scholarship Program The Bank paid back to society and burnished its corporate image by offering scholarship to 300 outstanding students in domestic colleges and universities.

Report of Independent Accountants

PRICEWATERHOUSE COPERS ◎ 資 誠 會 計 師 事 務 所

To: The Board of Directors and Stockholders of First Commercial Bank Co., Ltd.

We have audited the accompanying balance sheets of First Commercial Bank Co., Ltd. (the Bank) as of December 31, 2006 and 2005, and the related statements of income, of changes in stockholders' equity and of cash flows for the years then ended. These financial statements are the responsibility of the Bank's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the "Rules Governing Audit of Financial Statements of Financial Institutions by Certified Public Accountants" and generally accepted auditing standards in the Republic of China. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of First Commercial Bank Co., Ltd. as of December 31, 2006 and 2005, and the results of its operations and its cash flows for the years then ended in conformity with the "Guidelines Governing the Preparation of Financial Reports by Public Banks", "Business Entity Accounting Law", "Regulation on Business Entity Accounting Handling" and generally accepted accounting principles in the Republic of China.

As described in Note 2 to the financial statements, First Commercial Bank Co., Ltd. has adopted the Statements of Financial Accounting Standards (SFAS) No. 34 "Financial Instruments: Recognition and Measurement" and No. 36 "Financial Instruments: Disclosure and Presentation", effective from January 1, 2006. The financial statements for the period from January 1 to December 31, 2005 were not retroactively adjusted but were reclassified to conform with the presentation for the period from January 1 to December 31, 2006.

Notes to Financial Statements

(Expressed in thousands of New Taiwan dollars, unless otherwise indicated)

1. Summary of Significant Accounting Policies

The financial statements are prepared in conformity with the "Guidelines Governing the Preparation of Financial Reports by Public Banks", "Business Entity Accounting Law", "Regulation on Business Entity Accounting Handling" and generally accepted accounting principles in the Republic of China. Due to the characteristics of the banking industry, its business cycle cannot be clearly defined. Hence, the accounts on the accompanying financial statements are not classified into current and non-current items. Nevertheless, accounts are properly categorized according to the nature of each account, and sequenced by their liquidity. Significant accounting policies of the Bank are summarized below:

(1) Principles for preparation of financial statements

The accompanying financial statements include head office account, branch account and offshore banking branch account. All inter-office accounts have been eliminated.

The Bank adopts the Statement of Financial Accounting Standard No. 28, "Financial Statement Disclosure Standards for Banks", whereby assets and liabilities are not required to be classified under current or non-current categories.

(2) Financial assets and financial liabilities at fair value through profit or loss

Equity securities and beneficiary certificates are accounted for using trade date accounting; debt securities and derivative financial instruments are accounted for using settlement date accounting. Financial instruments are initially recognized at fair value.

Financial assets and financial liabilities at fair value through profit or loss shall be measured at fair value with changes in fair value recognized as gains or losses in the current period. For stocks listed on Taiwan Stock Exchange ("TSE") or Over-the-Counter ("OTC") and closed-end funds, fair value is determined based on the closing price at the balance sheet date. For open-end funds, fair value is determined based on the net asset value of the given fund at the balance sheet date. For beneficiary securities, fair value is determined based on the discounted value of expected future cash flows at the balance sheet date. For bonds listed on TSE or OTC, fair value is determined based on the latest transaction price of Automatic Order Matching and Execution System in OTC. For those bonds not listed on TSE or OTC, fair value is determined based on the discounted value of expected future cash flows at the balance sheet date or the market

price provided by Bloomberg, Reuters or counterparties. For derivative financial instruments for trading purpose, fair value is determined based on a quoted market price in an active market at the balance sheet date if there is a quoted market price in an active market, or determined based on applying other valuation techniques, such as discounted cash flow analyses or option pricing models, to estimate the fair value at the balance sheet date if there is no quoted market price in an active market.

The criteria to designate financial assets and financial liabilities as at fair value through profit or loss are as follows:

- * Hybrid (combined) instruments;
- * The designation can eliminate or significantly reduce a measurement or recognition inconsistency; or
- * The designation is in compliance with a documented risk management or investment strategy of the Bank to evaluate the performance of assets or liabilities based on a fair value basis.

Please refer to Note 2 to the financial statements for details about accounting treatment prior to December 31, 2005.

(3) Bills and bonds under repurchase or resale agreements

Bills and bonds under resale or repurchase agreements are accounted for under the financing method. Bills and bonds sold under repurchase agreements are recorded as "Bills and bonds payable under repurchase agreements" at the sale date. Bills and bonds invested under resale agreements are recorded as "Investments in bills and bonds under resale agreements" at the purchase date. The difference between the cost and the repurchase price is recorded as interest expenses between the sale date and the repurchase date. The difference between the cost and the resale price is recorded as interest income between the purchase date and the resale date.

(4) Bills discounted and loans

Bills discounted and loans (including non-performing loans) are recorded at the amounts of principal outstanding. Interest income is recognized on an accrual basis except for interest on non-performing loans.

All non-performing loans under which there is no principal payment after the lapse of six full months, lawsuit has been filed against borrower and guarantor(s) or the collaterals are executed shall be transferred to non-accrual loans account item. Interest shall cease to be accrued for non-performing loans that are transferred to non-accrual loans account item. Any unpaid interest due on a non-

performing loan prior to its transfer to a non-accrual loan shall be transferred to the non-accrual loans item together with principal.

When there is postponement or modification of the credit terms for the debtors, the Bank agrees to receive partial interests and the rest of interests will cease accrual and will be recognized after cash is received.

(5) Allowance for credit losses

The Bank shall classify credit assets of on and off balance sheet and determine the allowance for credit losses by evaluating the recoverability of the outstanding balances of various loans at the balance sheet date according to "Guidance for Credit Assets Risk Assessment" and "Standard for Risk Classification of Credit Assets". As to non-credit assets, the Bank evaluates the possible risks by the characteristics of assets, in accordance with "Guidance for Non-credit Assets Risk Assessment" and generally accepted accounting principles.

On and before June 30, 2005, loans were classified into four categories: (1) pass (2) substandard (3) doubtful and (4) loss. Allowance for credit losses was provided at 0.04%, 1% (2% for credit card loans), 50%, and 100% on loans classified under categories I, 2, 3, and 4, respectively.

After June 30, 2005, according to the amended "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing / Non-accrual Loans" of the MOF, loans are classified into five categories: (1) normal (2) special attention (3) substandard (4) doubtful and (5) unrecoverable. Except that the normal loans are classified under category 1, the abnormal loans shall be evaluated based on the status of the loan collateral and the length of time overdue. The allowance for credit losses for abnormal loans is provided at 2%, 10%, 50%, and 100% on loans classified under categories 2, 3, 4, and 5, respectively. Furthermore, the additional reserve is provided for specific loans as needed if the aforementioned allowance is insufficient according to the recoverability.

Upon the approval of the Board of Directors and the notice to the supervisors of the Bank, the overdue loans are written off in accordance with the guideline of the "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing / Non-accrual Loans".

(6) Available-for-sale financial assets

Equity securities are accounted for using trade date accounting. Debt securities are accounted for using settlement date accounting. Such financial instruments are initially recognized at fair value plus the acquisition or issuance cost.

Available-for-sale financial assets are measured at fair value with changes in fair value recognized in an adjustment account in the stockholders' equity. When the financial asset is derecognized, the cumulative gain or loss that was previously recognized in equity is recognized in profit or loss in the income statement. For stocks listed on TSE or OTC and closed-end funds, fair value is determined based on the closing price at the balance sheet date. For open-end funds, fair value is determined based on the net asset value of the given fund at the balance sheet date. For beneficiary securities, fair value is determined based on the discounted value of expected future cash flows at the balance sheet date. For bonds listed on TSE or OTC, fair value is determined based on the latest transaction price of Automatic Order Matching and Execution System in OTC. For those bonds not listed on TSE or OTC, fair value is determined based on discounted value of expected future cash flows at the balance sheet date or the market price provided by Bloomberg or Reuters.

An impairment loss is recognized when there is objective evidence of impairment. In the subsequent period, if the amount of the impairment loss decreases due to an event occurring after the impairment was originally recognized, for equity instruments, the decrease shall be recognized as an adjustment account in the stockholders' equity; and for debt instruments, the previously recognized impairment loss is reversed through profit and loss.

Please refer to Note 2 to the financial statements for details about accounting treatment prior to December 31, 2005.

(7) Held-to-maturity financial assets

Held-to-maturity financial assets are accounted for using settlement date accounting and are initially recognized at fair value plus the acquisition or issuance cost. Gains and losses are recognized in the income statement when the investments are derecognized.

Held-to-maturity financial assets are measured at amortized cost using the interest method at the balance sheet date.

An impairment loss is recognized when there is objective evidence of impairment. In the subsequent period, if the amount of the impairment loss decreases due to an event occurring after the impairment was originally recognized, the previously recognized impairment loss is reversed through profit and loss to the extent that the carrying amounts shall not exceed the amortized cost that would have been determined had no impairment loss been recognized in prior years.

Please refer to Note 2 to the financial statements for details about accounting treatment prior to December 31, 2005.

(8) Equity investments accounted for under the equity method

Long-term equity investments that the Bank owns at least 20% of the investees' voting stock interests or exercises significant influence over the investees are accounted for under the equity method. The carrying amount of such equity investments are evaluated pursuant to the investment costs plus or minus the net income or loss and changes in stockholders' equity of the investee recognized proportionally according to the percentage of the investee's ownership held by the Bank. The cash dividends received from investees are recorded as deduction of the investment cost. When there is sufficient evidence to indicate that the fair value of the investment is impaired and the probability of the recovery is remote, the loss on investments is recognized in the current period. For the stock dividends received from investees, the investment amount will not be increased and the investment income will not be recognized. A memorandum entry will be made to record the additional shares received. When equity investments are disposed of, the cost is calculated under the weighted average method.

Effective from January 1, 2006, for an investee company accounted for under the equity method, if the Bank does not have control interests but can exercise significant influence over the investee, investment losses are recognized to the extent that the balance of the investment plus advances to the investee is reduced to zero, unless the Bank guarantees the debts of investee company or has a commitment or intention to provide financial support to the investee company and then recognizes the investment loss proportionally according to the percentage of the investee's ownership held by the Bank continuously. However, if the Bank has control interests over the investee company, the investment losses in excess of the investee's stockholders equity's balance shall be fully recognized, unless other stockholders of the investee company have the obligation and ability to provide additional capital to take the losses. When the investee company begins to make a profit in the subsequent periods, the earnings are attributed to the Bank until the originally recognized excess losses are fully recovered.

The cumulative translation adjustment resulted from the financial statement translation of foreign equity investments accounted for under the equity method is recognized proportionally in the stockholders' equity account based on the percentage of the investees' ownership held by the Bank.

(9) Other financial assets and financial liabilities

 Financial assets measured at cost Long-term investments in equity securities, which are not listed on TSE or OTC, are accounted for using trade date accounting. Such financial instruments are initially recognized at fair value plus the acquisition or issuance cost and are subsequently carried at cost at the balance sheet date.

For financial assets measured at cost, an impairment loss shall be recognized if there is objective evidence of impairment. The impairment loss shall not be reversed.

Please refer to Note 2 to the financial statements for details about accounting treatment prior to December 31, 2005.

2) Bond investments with no active market Bond investments with no active market are accounted for using settlement date accounting. Such financial instruments are initially recognized at fair value plus acquisition or issuance cost. Gains or losses are recognized in the income statement when the investments are derecognized.

Bond investments with no active market shall be subsequently measured at amortized cost using the interest method.

An impairment loss is recognized when there is objective evidence of impairment. In the subsequent period, if the amount of the impairment loss decreases due to an event occurring after the impairment was originally recognized, the previously recognized impairment loss is reversed through profit and loss to the extent that the carrying amounts shall not exceed the amortized cost that would have been determined had no impairment loss been recognized in prior years.

Please refer to Note 2 to the financial statements for details about accounting treatment prior to December 31, 2005.

3) Derivative financial assets and financial liabilities for hedging Derivative financial instruments held as designated hedging instruments under hedge accounting are measured at fair values at the balance sheet date.

(10) Derivative financial instruments for hedging - fair value hedge

When all the criteria of fair value hedge accounting are met, it recognizes the offsetting effects on gains or losses of changes in the fair values of the hedging instrument and the hedged item. The Bank only have fair value hedge currently. The accounting treatment for hedging instruments is that the gain or loss from measuring the hedging instrument at fair value shall be recognized immediately in the statement of income. The accounting treatment for hedged items is that the gain or loss attributable to the hedged risk shall adjust the carrying amount of the hedged item and be recognized immediately in the statement of income.

(11) Properties, plants and equipments/Non-operating assets

Properties, plants and equipments/non-operating assets are stated at cost except for revaluation increment as permitted under the relevant regulations. Depreciation is provided on a straight-line basis over the estimated service lives of the assets plus an additional year as salvage value, except for leasehold improvements, which are depreciated over the shorter of the leasing periods of the lease agreement or 5 years. The service lives of major properties, plants and equipments range from 3 to 55 years.

Major renewals and improvements, which are incurred to increase the future economic benefits of the assets, are capitalized and depreciated. Routine maintenance and repairs are charged to expenses as incurred. When assets are sold or abandoned, the cost and accumulated depreciation are removed from the respective accounts and the related gain or loss on the disposal of property, plant and equipment is recorded as "other non-interest income or losses".

Rental or idle assets are classified under other assets - non-operating assets. Depreciation for current period is recognized as "other non-interest income or losses" and valued at the lower of carrying amount or recoverable amount as of the balance sheet date.

(12) Intangible assets

Intangible assets, mainly comprising computer software costs, are initially recorded at cost and amortized over 3 years under the straight-line method.

(13) Other assets

Other assets are mainly comprised of non-operating assets, foreclosed assets, refundable deposits, temporary payments and suspense accounts, prepayments, and other assets to be adjusted, and so on.

Foreclosed assets are recorded at acquisition costs and are revalued at the lower of carrying amounts or recoverable amounts as of the balance sheet date. If the foreclosed assets are impaired, an impairment loss is recognized in the current period. In the subsequent period, if the recoverable amounts increase, the previously recognized impairment loss is reversed to the extent that the carrying amounts, after the reversal, shall not exceed the carrying amounts that would have been determined had no impairment loss been recognized for the assets in the prior years.

(14) Pension plan

Under the defined benefit pension plan, net periodic pension costs are recognized in accordance with the actuarial calculations. Net periodic pension costs include service cost, interest cost, expected return on plan

assets, and amortization of unrecognized net transition obligation and gains or losses on plan assets. Under the defined contribution pension plan, net periodic pension costs are recognized as incurred on an accrual basis.

(15) Other liabilities

Other liabilities are mainly comprised of estimated land valuation increment tax accrual, guarantee deposit-in and margin deposits, advanced receipts, temporary receipts and suspense accounts, other carry forward accounts, reserve for guarantees and reserve for securities trading loss, and so on.

Reserves for guarantees are determined based on the estimated losses arising from default possibility of the ending balances of acceptances receivable, guarantees receivable, and letters of credit receivable, net of the margin deposits received from customers.

As required by the "Rules Governing Securities Firms", the Bank has to set aside 10% of the excess of monthly gains over losses from trading securities as the reserves for securities trading losses. Such reserves can be only used to offset losses over gains arising from the aforesaid securities trading. When the accumulated reserve reach \$200,000, no further reserve provision is required.

(16) Foreign currency transactions and translations of foreign currency financial statements

The Bank's foreign currency transactions are recorded in New Taiwan dollars at the spot rates of the transaction dates. Differences between actual payments or receipts and recorded transaction amounts are recognized as foreign exchange gains or losses in the current period. Assets and liabilities denominated in foreign currencies are revalued using the spot foreign exchange rates notified by the Central Bank at the balance sheet date. For the foreign currency denominated long-term equity investments, the related foreign exchange gains or losses are recognized as the cumulative translation adjustment in the stockholders' equity. The exchange differences resulting from the other assets and liability of foreign currencies are included in the current income or expense.

When the financial statements of foreign operation units are translated into New Taiwan dollars, all asset and liability accounts are translated using the spot foreign exchange rate at the balance sheet date, and the shareholders' equity accounts are translated at the historical foreign exchange rate except that the beginning retained earnings are stated at the translated carrying amount of the ending retained earnings in the prior year. The translation differences are recorded as the cumulative translation adjustment in the stockholders' equity.

(17) Impairment of assets

An impairment loss shall be recognized when circumstances that have changed or events that have occurred indicate that an asset's recoverable amount is less than its carrying amount. The recoverable amount of an asset is the higher of its 'fair value less costs to sell' and its 'value in use'. The fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable and willing parties, less the costs of disposal. The value in use is the present value of the future cash flows expected to be derived from an asset.

If there is an indication that an impairment loss recognized in the prior periods for an asset may no longer exist, the impairment loss recognized could be reversed, and such a reversal shall not exceed the impairment loss recognized in the prior periods.

(18) Recognition of interest and fee income

Revenues are recognized in accordance with the provisions of Statement of Financial Accounting Standards No. 32 "Accounting for Revenue Recognition" and the following statements.

Interest income on loans is recognized using the interest method on an accrual basis. However, interest income arising from loans which meet any of the following criteria is recognized on cash basis when the interests are received:

- * Reclassified as non-accrual loans.
- * Interest from restructured loans that are agreed to extend their maturities are not recognized as interest income but recorded on the memo accounts.

Handling fee is recognized when cash is received, or the earning process is substantially completed.

(19) Income tax

According to the Statement of Financial Accounting Standards No. 22 "Accounting for Income Taxes", the Bank is required to apply the inter-period and intra-period income tax allocations. Under the interperiod income tax allocation, the income tax effects of deductible temporary differences, loss carry forwards, and income tax credits are recognized as deferred income tax assets and liabilities. Valuation allowance is provided against deferred income tax assets if it is more likely than not that the deferred income tax assets will not be realized. The 10% surtax on undistributed current earnings calculated pursuant to the Income Tax Law is recorded as income tax expense in the year when the earning distribution is approved by the shareholders' meeting. The adjustment for over- or under-provision of previous years' income tax is included in the current vear's income tax.

Pursuant to the Explanatory Letter Tai-Tsai-Shui No. 0910458039 of the MOF dated February 12, 2003 to

promulgate the "Criteria for Profit-seeking Enterprises in Filing Consolidated Profit-seeking Enterprise Income Tax Returns According to Article 49 of the Financial Holding Company Act and Article 40 of the Business Mergers and Acquisitions Law", if a financial holding company holds at least 90% of the issued capital stock of its domestic subsidiaries for twelve months in a fiscal taxable year, starting from such a fiscal taxable year, the financial holding company may elect to have itself as the taxpayer to file the consolidated profit-seeking enterprise income tax returns. Accordingly, the Bank's parent company, First Financial Holding Co. has decided to file consolidated income fax return using a linked tax system 2004 to include the Bank and the associated entities including First Taisec Securities Inc., Mingtai Fire & Marine Insurance Co., Ltd. ("MFMI") (From September 2, 2005, MFMI was not the related party of the Bank) and National Investment Trust Co., Ltd. ("NITC").

The accounting treatment for the Bank including its parent company and associated entities to adopt the linked tax system to file the consolidated income tax return is in compliance with the Explanatory Note (92) No. 240 of the Accounting Research Development Foundation dated October 3, 2003.

Effective January 1, 2006, in accordance with the Alternative Minimum Tax Act, the Bank should calculate the alternative minimum tax in addition to the regular income tax. If the regular income tax is lower than the alternative minimum tax, the differences should be accrued as an income tax adjustment.

(20) Financial assets securitization transaction

According to the "Financial Asset Securitization Act" and the "Trust Law", the Bank entrusted the rights of personal residential mortgage loans and related rights and obligations to Deutsche Bank AG., Taipei Branch (the Trustee) under special purpose trust. The Trustee raised funds for the Bank by issuing beneficiary certificates. Because the Bank lost control of transferred assets under the framework of securitization transaction, the Bank derecognized the assets from loans and recognized servicing assets, recourse liabilities, and the gain on securitization. The portion of subordinated beneficiary certificates held by the Bank for credit enhancement was recorded as held-to-maturity financial assets.

There is no market price for the retained interests of the subordinated beneficiary certificates, so the Bank estimated the fair value based on the expected prepayment rate, expected weighted average useful lives, expected credit loss rate, and discount rate of residual cash flows.

Interest income is recognized with respect to the subordinated beneficiary certificates when the Trustee

pays the interest. The revaluation of subordinated beneficiary certificates is based on the present value of expected future cash flows as of the balance sheet date, and the difference results from revaluation is recognized as revaluation gain or loss.

Servicing assets are recorded as other assets and amortized under straight-line method over the period of service lives.

(21) Use of estimates

In preparing the financial statements in conformity with generally accepted accounting principles, the management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Therefore, actual results could differ from those estimates. (22) Contingency loss

If it becomes probable that assets have been impaired or liabilities have been incurred as of the balance sheet date based on the development of certain events and the loss amount can be reasonably estimated, the amount shall be recognized as current loss. If it becomes probable that assets have been impaired or liabilities have been incurred as of the balance sheet date based on the development of certain events but the loss amount can not be reasonably estimated, it shall be disclosed in the financial statements.

2. Change in Accounting Policy and its Impact(1) Impairment of assets

The Bank adoped the new Statement of Financial Accounting Standards No. 35 "Accounting for Impairment of Assets", effective from January 1, 2005. This change of accounting principle had no significant effect on the financial statements as of and for the year ended December 31, 2006.

(2) Financial instruments

- Effective from January 1, 2006, the Bank adopted the Statements of Financial Accounting Standards No. 34 and No. 36 to account for the financial instruments. Financial statements prior to December 31, 2005 were not retroactively adjusted but were reclassified to conform with the "Guidelines Governing the Preparation of Financial Reports by Public Banks", and Statements of Financial Accounting Standards No. 34 and No. 36.
- 2) Original accounting treatments before December 31, 2005 were as follows:
 - (a) Marketable and trading securitiesMarketable and trading securities were stated

at cost. Cost of securities was calculated based on the moving-average method. Subsequent revaluation at the balance sheet date was based on the lower of cost or market value on the aggregate basis. Trading securities are based on the closing prices at the balance sheet date, whereas listed stocks, over-the-counter (OTC) stocks, and beneficiary certificates of closedend mutual funds were determined by the average daily closing prices of the last month of the accounting period. Beneficiary certificates of open-end mutual funds were stated at net asset values at the balance sheet date. OTC bonds were determined by the closing prices at the balance sheet date or the period-end reference prices published by the OTC, whereas other bonds were stated at par values and were adjusted by accumulated unamortized discounts or premiums.

- (b) Derivative financial instruments
 - * Derivative financial instruments held for trading purpose Financial instruments and non-financial instru-

ments held from proprietary trading or other trading activities were measured at fair values as of the balance sheet date. Both realized and unrealized changes in the fair values were recognized as trading gains or losses in the current period.

* Derivative financial instruments for non-trading purpose

If derivative financial instruments were held to hedge risks associated with existing assets or liabilities, profits or losses arising from holding these financial instruments were recognized in the current period, and the carrying amounts of the hedged assets or liabilities are adjusted accordingly. If a derivative financial instrument was used to hedge risks associated with firm commitments or forecast transactions, the gains or losses arising from the derivative financial instrument were deferred. Such deferred gains or losses are either recognized as realized gains or losses or used to adjust the carrying amounts of the hedged assets or liabilities when the hedged transactions occur. When a derivative financial instrument contract was terminated prior to maturity, the gains or losses were deferred and amortized over the remaining period of the hedged assets or liabilities.

- (c) Other long-term investments
 - * Debt investments
 - Long-term bond investments were recognized at acquisition cost. The premiums (discounts) were amortized under the straight-line method, and the amortizations were treated as adjustment items to the interest income. Upon sales, the costs were calculated using the moving average method. Beneficiary securities were recognized at acquisition cost and were revaluated at discounted value of expected future cash flows at the balance sheet date. The differences arising from revaluation were recognized as gains or losses on revaluation.
 - Equity investments
 Equity investments were recognized at acquisition cost and stated at cost at balance sheet

- date. Upon sales, costs were determined by the specific identification method.
- (d) Long-term equity investments under the cost method
 Investments that the Bank owned less than 20% of the voting stock interests and had no ability to exercise significant influence over the investee were stated at the lower of cost and market value for a listed company with unrealized loss recorded as a reduction in the
 - the investee were stated at the lower of cost and market value for a listed company with unrealized loss recorded as a reduction in the stockholders' equity, and were stated at cost for unlisted companies. In the event of a permanent diminution in value of the unlisted companies, the book value of the investments was written down to their new value and a realized loss is recognized in the current period.

December 21 2006 December 31 2005

3) The change in accounting principle for such financial instruments resulted in a credit to other stockholders' equity of \$6,252,298, and the effects on net income for 2006 were as follows:

	 Amount	J	s per share dollars)
Income before income tax	\$ 387,930	\$	0.08
Cumulative effect of a change in accounting principle			
(net of income tax expense)	563,169		0.12
Net income	\$ 951,099	\$	0.20

3. Summary of Significant Accounts

(1) Cash and cash equivalents

	December 31, 2006		Decei	mber 31, 2005
Cash on hand	\$	8,953,504	\$	8,864,414
Checks for clearing		26,328,945		25,091,694
Due from other banks		2,739,452		4,080,325
Total	\$	38,021,901	\$	38,036,433

(2) Due from Central Bank and other banks

	December 31, 2006		Dece	mber 31, 2005
Reserve for deposits - account A	\$	11,086,379	\$	12,521,400
Reserve for deposits - account B		29,744,179		29,038,509
Deposits with Central Bank		2,100,000		-
Inter-bank clearing fund		1,824,879		1,822,413
Reserve for deposits - foreign currency		143,301		122,864
Deposits of overseas branches with foreign Central Banks		866,079		523,587
Deposits of national treasury account		862,475		926,905
Call loans to other banks		94,337,062		74,636,363
Overdrafts to other banks		1,879		6,588
Total	\$	140,966,233	\$	119,598,629

The Bank's reserve for deposits is required by the Banking Law to maintain the reserve requirements based on the monthly average balance of each kind of deposits and the reserve ratio set by the Central Bank and to deposit in the reserve deposit account at the Central Bank. According to the regulations, such reserve requirements for reserve for deposits - account B can not be withdrawn except for monthly adjustments of the reserve for deposits.

(3) Financial assets at fair value through profit or loss - net

	December 31, 2006		December 31, 2005	
Financial assets for trading purpose				
Stocks	\$	2,340,269	\$	1,901,149
Bonds (government bonds, financial bonds and corporate bonds)		6,920,217		6,852,964
Beneficiary certificates		185,000		1,350,000
Other marketable securities		450,400		450,515
Derivative financial instruments		3,226,430		605,460
Valuation adjustment for financial assets for trading purpose-				
non-derivative instruments		495,665		-
Subtotal		13,617,981		11,160,088
Financial assets designated as at fair value through profit or loss				
Bonds		28,275,660		26,258,160
Valuation adjustment for financial assets designated as at fair value				
through profit or loss		901,326		-
Subtotal		29,176,986		26,258,160
Total	\$	42,794,967	\$	37,418,248

For the year ended December 31, 2006, the net gains on financial assets for trading purpose and the net realized and unrealized gains (including interest income) on designated financial assets as at fair value through profit or loss amounted to \$10,308,255.

Financial instruments designated as at fair value through profit or loss are to eliminate or significantly reduce a measurement or recognition inconsistency and to evaluate the performance of assets on a fair value basis.

Types of derivative financial instruments held for trading purpose and related contract information were as follows:

	December 31, 2006			December 31, 2005		
Financial Instruments	ontract amount otional principal)	Credit risk		ontract amount tional principal)	Credit risk	
Trading Purpose						
Foreign exchange contracts						
(FX swaps and forwards)	\$ 75,706,549	\$ 623,245	\$	84,967,185	\$ 715,844	
FX margin trading	4,831,217	228,403		3,334,360	3,929	
Non-delivery FX forwards	8,547,101	74,462		691,756	46,023	
FX options written	6,240,980	-		858,549	-	
Interest rate swaptions written	12,000,000	_		-	-

Interest rate swap contracts	253,063,431	1,910,887		56,295,744	551,625	
Futures margin deposits (note)		120,104		-	_	

note: It is the excess margin deposits that the Bank paid for before it started to engage in futures trading.

(4) Investments in bills and bonds under resale agreements

	December 31, 2006			er 31, 2005
Government bonds under resale agreement	\$	501,616	\$	-

After December 31, 2006, the Bank is obliged to sell the above bonds at purchase price plus a mark-up based on the resale agreements, and such resale amount was \$501,684.

(5) Receivables - net

	December 31, 2006		Decer	mber 31, 2005
Interest receivable	\$	5,979,672	\$	5,803,525
Factoring receivable		696,649		573,307
Acceptances receivable		7,668,753		7,009,460
Credit card account receivable		3,889,963		5,106,762
Accounts and notes receivable		335,796		1,297,822
Income tax refundable		1,637,144		1,556,727
Accrued income		270,040		216,139
Other receivables		1,041,907		1,079,090
		21,519,924		22,642,832
Less: allowance for doubtful accounts		(224,439)		(193,049)
Net amount	\$	21,295,485	\$	22,449,783

As of December 31, 2006 and 2005, the Bank's reserves for guarantees, including acceptances receivable and guarantees receivable, are both \$450,518, and such reserves are recorded under "other liabilities".

(6) Bills discounted and loans - net

	December 31, 2006		Dece	mber 31, 2005
Bills discounted	\$	5,407,731	\$	5,482,397
Overdrafts		998,330		1,465,029
Short-term loans		296,408,656		268,392,254
Medium-term loans		282,330,615		269,233,318
Long-term loans		375,619,193		336,744,359
Import-export negotiations		3,758,831		3,244,034
Non-accrual loans		15,555,942		14,138,829
Sub-total		980,079,298		898,700,220
Less: allowance for credit losses		(8,034,718)		(8,108,416)
Net amount	\$	972,044,580	\$	890,591,804

Gain from hedge evaluation is \$187,907, which was included in the balances of loans as of December 31, 2006. Fair values of fixed-rate loans held by overseas branches may fluctuate with changes in interest rates. To prevent the risk that might be significant, the Bank has engaged in interest rate swap contracts to hedge the risk.

As of December 31, 2006 and 2005, non-accrual loans and other credit extensions where interest accruals had been ceased are \$15,416,656 and \$14,115,475, respectively. For the years ended December 31, 2006 and 2005, interest receivable that was not accrued is \$505,367 and \$458,714, respectively.

Proper prosecutions of claims against debtors have been made before any credit extensions and loans were written off for the years ended December 31, 2006 and 2005.

The Bank's business segment has revalued the allowance for doubtful receivables, loans, bills discounted, and non-accrual loans by considering unrecoverable risks for the specific loans and inherent risks for the overall loan portfolio. Movements in allowance for credit losses for the years ended December 31, 2006 and 2005 are as follows:

For the year ended December 31	1, 2006
--------------------------------	---------

The Ministry of Finance approved the Bank's takeover of five credit departments of Farmers' and Fishermen's Associations in Taiwan effective from September 14, 2001. The acquired assets together with the indebtedness were transferred to the Bank. The RTC Fund has partially reimbursed the losses suffered by the Bank. The remaining portions of disputed assets and liabilities, under current investigation, have been temporarily recorded in "other assets to be adjusted" and "other liabilities to be adjusted", respectively. Upon settlement, the balance will be transferred to appropriate accounts and any deficiency will be compensated by the RTC fund.

Effective from January 1, 2005, the Bank adopted the SFAS No. 35 "Accounting for Impairment of Assets". The impairment losses of foreclosed assets of \$21,739 and \$1,643, respectively, were recognized for the years ended December 31, 2006 and 2005.

- 1) The Bank has a defined benefit pension plan set up in accordance with the Labor Standards Law, covering all regular employees whose services are prior to the implementation of the Labor Pension Act on July 1, 2005 and those employees who chose continuously to apply the Labor Standards Law after the implementation of the Labor Pension Act. The payment of pension benefits is based on the length of the service period and average monthly compensation in the last six months prior to retirement. Under the defined benefit plan, employees are granted two points for each year of service for the first 15 years and are granted one point for each additional year of service from the 16th year, but it is subject to a maximum of 45 points. The Bank makes contribution monthly based on 10% of salaries and such contributions are deposited in the designated pension account at the Central Trust of China under the names of the respective companies' independent retirement fund committees. The Bank recognized pension expenses of \$615,872 and \$713,734 for the years ended December 31, 2006 and 2005, respectively. As of December 31, 2006 and 2005, the balances of the pension fund deposited in the Central Trust of China were \$3,278,437 and \$2,824,130, respectively.

5) Effective July 1, 2005, the Bank has established a funded defined contribution pension plan (the "New Plan") under the Labor Pension Act (the "Act"). Employees have the option to be covered under the New Plan. And, the Bank contributes monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are portable when the employment is terminated. The pension costs under defined contribution pension plan for the years ended December 31, 2006 and 2005 were \$66,756 and \$33,255, respectively.

Others12,243	15,099
Total \$ 8,815,973	\$ 8,833,224

(22) Common stock

As of December 31, 2006 and 2005, the authorized and issued capital stocks were both \$46,216,000. Total issued and outstanding shares were both 4,621,600 thousand shares with a par value of \$10 New Taiwan dollars per share.

(23) Additional paid-in capital

Additional paid-in capital mainly includes capital in excess of par value on issuance of common stock and donation income.

The Company Law requires that additional paid-in capital, resulting from price received in excess of par value of the issuance of capital stock and donation income received, should be only used to recover losses or to increase the capital stock of the Bank subject to a maximum limit of 10% of the issued capital stock per year while the Bank has no accumulated deficit.

(24) Other stockholders' equity

According to Amended Land Tax Ruling No. 33 approved by the Legislative Yuan on January 21, 2005 effective February 1, 2005, the Bank reclassified reserve for land revaluation increment tax of \$3,104,131 to reserve for surplus from land revaluation, due to the reduction in land revaluation increment tax rate. The adjustment increases stockholders' equity amount.

The revaluation increments of land will adjust the original subject asset accounts, other liability account - reserve for land revaluation increment tax and stockholders' equity account - revaluation increments. Upon disposal, the Bank will reverse the reserve for land revaluation increment tax and the stockholders' equity - revaluation increments accounts and recognize the disposal gain or loss.

(25) Legal reserve and special reserve

1) Legal reserve

According to the Company Law, legal reserve can be only used to recover accumulated deficits or to increase capital stock and shall not be used for any other purposes. Legal reserve can be used to increase capital stock if the balance of the legal reserve has reached fifty percent of the issued capital stock, but only half of the legal reserve can be capitalized.

2) Special reserve

Pursuant to the regulations of the Securities & Futures Bureau, Financial Supervisory Commission, Executive Yuan, except for setting aside legal reserve, the Bank is required to set aside a special reserve in an amount equal to the reduction of stockholders' equity, such as unrealized loss on available-for-sale financial assets and cumulative translation adjustment. Such special reserve is not available for dividend distribution. In subsequent year(s), if the year-end balances of such items are no longer resulted in a reduction in stockholders' equity, the special reserve previously set aside will then be available for distribution.

(26) Unappropriated earnings

- 1) As stipulated by the Bank's Articles of Incorporation, the annual net income after income tax should be first used to offset accumulated losses, then 30% of it should be set aside as legal reserve. The Bank can also set aside a special reserve for specific business purposes. The remaining earnings are to be distributed as follows:
 - 1% to 8% as bonus to employees.
 - Dividend and bonus to shareholders as proposed by the Board of Directors after considering the capital
 adequacy ratio and the need for business development, and approved by the shareholders' meeting. (The
 Board and Directors function is in an acting capacity of shareholders' meeting.)

- 2) Dividend policy for the next three years
 - Banking industry is a fully developed industry and the Bank, operating under a solid financial base, has maintained a stable income. The Bank has set up its dividend policy to be primarily in form of cash dividends and supplemented by share dividends, as to increase its capital adequacy ratio and to enhance its competitiveness. If the legal reserve is less than the capital or the capital adequacy ratio is below the statutory ratio stipulated by the Banking Law, the maximum amount of cash dividend distribution has to be subject to the stipulations set out by the Banking Law and the governing authorities.
- 3) As of the opinion date, the appropriation of 2006 earning has not been resolved by the Board of Directors. Details of 2004 and 2005 earning distributions are summarized as below:

	Appropriation of earnings			Earnings per share (in dollars)				
		2005	2	2004		2005		2004
Legal reserve	\$	3,065,687	\$	2,990,128	\$	-	\$	-
Cash dividends		6,431,671		3,466,200		1.39		0.75
Employees bonuses		500,729		488,388				
	\$	9,998,087	\$	6,944,716	\$	1.39	\$	0.75

Employee bonuses are paid in cash. If the employee bonuses are recognized as expenses in the year of appropriation, the earnings per common share after tax in 2005 will be decreased from \$ 2.21 to \$ 2.10.

4) Information on the appropriation of the Bank's earnings as resolved by the Board of Directors and approved by the shareholders' meeting will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

(27) Other non-interest income or losses

	For the years ended December 31,				
		2006		2005	
Recovered bad debts and overdue accounts	\$	3,612,391	\$	4,013,695

					January 1 to December 3	1, 2005	5			
		P	١om	unt	Adjusted weighted average	Earnings per share (in dollars)				
		Before tax		After tax	outstanding common stock (in thousand shares)	Before tax		After tax		
Net income	\$	13,601,135	\$	10,218,955	4,621,600	\$	2.94	\$	2.21	

(31) Capital adequacy ratio

The minimum capital adequacy ratio, a measure of the adequacy of a bank's capital expressed as a percentage of its risk weighted credit exposures, is 8% as required by the Banking Law and other relevant rules and regulations in order to ensure a sound financial standing for banks. If the said ratio is less than the prescribed ratio, the bank's ability to distribute surplus profits may be restricted by the governing authority.

The capital adequacy ratio of the Bank was 11.00% and 10.24% as of December 31, 2006 and 2005, respectively.

(32) Asset securitization transactions

1) Product nature and profit (loss)

On March 2, 2004, 2,026 items of residential mortgage loans with the carrying amount of \$4,572,697 were sold through securitization transaction and were entrusted to the trustee under a special purpose trust (SPT) to issue beneficiary certificates. One was senior beneficiary certificates of \$4,280,000, which were issued at par value and were classified into three classes of certificates with floating rates as follows:

- Certificate A: the issue amount was \$3,910,000 and the coupon rate was the adjustable rate mortgage (ARM) index plus 0.25%.
- Certificate B: the issue amount was \$220,000 and the coupon rate was the adjustable rate mortgage (ARM) index plus 0.55%.
- Certificate C: the issue amount was \$150,000 and the coupon rate was the adjustable rate mortgage (ARM) index plus 0.65%.

The other was a subordinated beneficiary certificate of \$292,697 issued for a credit enhancement purpose with non-interest bearing and was purchased by the Bank. If debtors are unable to pay off the principal and related interest when due, the investors and the trustee have no recourse to the Bank's assets. The repayment of the principal with respect to retained interests is subordinated to investors, and the value of the retained interests is affected by the transferred debt's credit risk, prepayment rate, and interest rate risk. For the years ended December 31, 2006 and 2005, the Bank has recognized the interest income from subordinated beneficiary certificates in an amount of \$12,914 and \$42,752, respectively.

2) Cash flows

The cash flows received from and paid to securitization trusts are summarized as follows:

	Fo	r the years end	ed Dec	cember 31,	
		2006	2005		
Proceeds from securitization					
Servicing fee income received	\$	1,008	\$	6,342	
Proceeds from other cash flows of retained interests		12,321		40,187	
Setting aside as cash reserves (recorded under "refundable deposits")		-		-	
Setting aside as cash reserves of servicing institution		5,968		-	
Essential reserves received		67,767		16,717	

3) Recognition and measurement of servicing assets

As of December 31, 2006 and 2005, the amounts of servicing assets are \$0 and \$5,463, respectively, and the amounts of the servicing assets after amortization are \$0 and \$3,619, respectively, and the servicing assets are recognized as "other assets".

4) Termination of securitization contract

As of December 16, 2005, the Board of Directors of the Bank had passed the resolution to redeem all residential mortgage loans. As of April 3, 2006, the Bank redeemed all of the aforementioned beneficiary certificates (Certificate A, B, C, and D) and terminated the related contracts. Thus, the Bank did not disclose information about the major assumptions for measuring retained interests, sensitivity analysis for cash flows at fair value, and expected static pool loss rate.

4. Related Party Transactions

Customers' securities under custody		557,364,182		536,530,185
Book-entry for government bonds under management		108,881,150		95,900,700
Depository for short-term marketable securities under management		43,508,824		35,973,717

- (2) Given the collapse of the Tung Xin building caused by an earthquake disaster happened on September 21, 1999, the residents filed a legal claim of loss of personal properties against Hong Cheng Building Co., Ltd., Hong Ku Construction Co., Ltd., (including its directors and supervisors), and the Bank. Up to now, the case is still being heard by the Taipei District Court. However, the Bank's attorney believes that the Bank may prevail in the case because there is no evidence found between the cause of collapse and the Bank's maintenance construction work, nor is any malicious misconduct or negligence on the part of the Bank. Accordingly, no provision is made for the contingent liabilities in the Bank's financial statements.
- (3) The Bank rented office spaces under operating leases. As of December 31, 2006 the estimated future lease commitments for the Bank are as follows:

Period	Amount		
2007	\$	494,359	
2008		365,704	
2009		222,828	
2010		120,471	
2011 and thereafter		155,317	
	\$	1,358,679	

4) Others

As of December 31, 2006, the Bank had entered into the construction contracts in the amount of \$238,250, \$75,123 (including sundry expenses) of which had been paid and recorded in "construction in progress and prepayments for equipments" account.

- 7. Significant Losses from Disasters: None
- 8. Significant Subsequent Events: None
- 9. Others

- 2) Methods and assumptions used by the Bank to measure the fair value of financial instruments are summarized as follows:
 - (a) Cash and cash equivalents, due from Central Bank and other banks, investment in bills and bonds under resale agreements, receivables (net of allowance for doubtful accounts), refundable deposits, bill purchased, due to Central Bank and other banks, bills and bonds payable under repurchase agreements, funds borrowed from Central Bank and other banks, guarantee deposits, payables, and so on. The fair values of financial instruments listed above are estimated at carrying amounts at balance sheet date, as the maturity date is near the balance sheet date or the future receivable or payable amount is close to the carrying amount.

- (b) Bills discounted and loans (including non-performing loans): Considering the nature of the financial service industry, which is the market rate (market price) maker, the effective interest rates of loans are generally based on the basic interest rate or the interest rate index plus (minus) certain adjustment (point) (equivalent to floating rate) to reflect the market rate. As a result, it is reasonable to assume that book value, after adjustments of reserves based on estimated recoverability, approximate fair values. Fair values for mid-term and long-term loans with fixed rates shall be estimated using their discounted values of expected future cash flows. However, as such loans account for only a small portion of all loans, book value was used to estimate the fair value.
- (c) The fair values of derivative financial instruments are estimated based on the amounts expected to receive or pay under the given situation that the derivative contracts are terminated pursuant to contract terms at the balance sheet date. In general, such an amount includes unrealized gains or losses on outstanding derivative contracts. The Bank adopts the valuation model that is identical to the market to determine the fair values of derivative financial instruments.
- (d) When there is a quoted market price available in an active market for available-for-sale financial assets and held-to-maturity financial assets, the fair value is determined using the quoted market price. If there is no quoted market price for reference, a valuation technique will be adopted to measure the fair value. The estimation and assumption of the valuation technique used by the Bank is consistent with those used by the market participants for financial instrument pricing. The discount rate used is consistent with the expected return rate of the financial instruments that have the same conditions and characteristics. Such conditions and characteristics include the debtor's credit rating, the remaining period of the fixed interest rate contracts, the remaining period for principal repayment, the payment currency, etc.
- (e) Deposits and remittances: Considering the nature of the financial service industry, which is the market rate (market price) maker, and that deposit transactions usually mature within one year, a book value is a reasonable basis to estimate the fair value. Fair values for long-term fixed rate deposits shall be estimated using their discounted values of expected future cash flows. However, as these deposits account for only a small portion of all deposits and as their maturities are less than three years, it is reasonable to estimate the fair value by the book value.
- (f) Financial bonds payable: Since the coupon rates of the senior and subordinated corporate bonds and financial bonds issued by the Bank approximate the market rates, the fair value based on the discounted value of expected future cash flows approximates the book value.
- (g) Other financial assets bond investments with no active market: If there is an actual transaction price or a quoted market price, the fair value of such bond investments will be determined by the latest actual transaction price or quoted market price. Moreover, if there is no quoted market price for reference, a valuation technique will be adopted to measure the fair value, and the valuation technique the Bank adopted is the discounted values of expected future cash flows.
- (h) The fair value measurement is not applicable to equity investments accounted for under the equity method. In addition, there is no quoted market price in an active market for the unlisted stocks under the financial asset carried at cost, and their variability in the range of reasonable fair value estimates is not insignificant and their probability of the various estimates within the range can not be reasonably assessed, so the fair value of the unlisted stocks is not reliably measurable. As a result, information of the book value and the fair value with respect to these financial assets is not disclosed.
- 3) The Bank has recognized \$810,492 of current net gains on changes in fair value arising from valuation techniques for the year ended December 31, 2006.
- 4) As of December 31, 2006, the Bank has financial assets with fair value risk arising from interest rate changes amounted to \$94,896,076.
- 5) As of December 31, 2006, the Bank has financial assets with cash flow risk arising from interest rate changes amounted to \$13,509,795.
- 6) For the year ended December 31, 2006, the Bank has recognized interest income and interest expenses from the financial assets or financial liabilities not at fair value through profit or loss amounted to \$42,937,557 and

\$22,556,811, respectively. The Bank has recognized the change in fair value of available-for-sale financial assets and has recorded as an adjustment account in the stockholders' equity amounted to \$6,252,298, and the amount of the gain on fair value change reclassified from the stockholders' equity into the statement of income was \$371,637 for the year ended December 31, 2006.

- 7) Risk management and hedging strategy (including financial hedge)
 - (a) The Bank engages in risk management and hedge under the principles of not only serving customers but also conforming to the Bank operational goal, overall risk tolerance limit, and legal compliance to achieve risk diversification, risk transfer, and risk avoidance, and to maximize the benefits of customers, shareholders, and employees. The Bank mainly faces the credit risk, market risk (including the interest rate, foreign exchange rate, equity securities, and instrument risk), operational risk, and liquidity risk regardless whether they are on or off balance sheets.
 - (b) The Bank's Board of Directors has the ultimate approval right in risk management. Major management risk items that include the bank-wide risk management policy, risk tolerance limit, and authority must be approved by the Board of Directors. Under the Board of Directors, there is a risk management committee, which is responsible to review, supervise, report, and coordinate bank-wide risk management. Besides, Risk Management Center, which is independent from business units, is comprised of Regional Center, Risk Management Division, Credit Approval Division, Special Asset Management Division and Research Division, and is responsible for implementing the risk management strategy of the Bank.
 - (c) The goal of market risk management of the Bank is to achieve optimal risk position, maintain proper liquidity position, and manage all market risk centralized by considering the economic environment, competition condition, market value risk, and impact on net interest income. In order to achieve this goal, the Bank's hedge activities concentrate on risk transfer and risk management of net interest income and market value risk. The Bank set the strategy of fair value hedge of interest rate exposure according to the fund transfer pricing principle. The Bank primarily uses interest rate swaps to hedge fair value changes, and also hedges the interest rate exposure of partial fixed-rate loans and fixed-rate liabilities.

8) Financial risk information

(a) Market risk

The Bank sets the specific trade period, position limit, and stop loss limit for its investments in marketable securities according to different degrees of risk for each specific product. The Bank monitors those limitations by various risk indicators such as value at risk, DV01, and GREEKs. In addition, the Bank periodically conducts the risk sensitivity analysis of bank-wide positions.

Each derivative financial instrument transaction undertaken by the Bank has set the open aggregate position limit and maximum loss tolerance amount to control the market risk of derivative financial instruments. In addition, the profit and loss arising from fluctuations in the market interest rate or foreign exchange rate will be substantially offset by the profit and loss from hedged items, and thus those instruments would not expose the Bank to the significant market risk.

The Bank calculates the capital requirements of financial instruments in compliance with the Standardized Approach, and the estimated values of the risk-weighted assets are stated as follows:

Type of market risk	Decemb	er 31, 2006	December 31, 2005		
Interest rate risk	\$	900,996	\$	2,562,201	
Equity securities risk		404,043		556,984	
Foreign exchange risk		465,141		171,485	

(b) Credit risk

Financial instruments held by the Bank may incur losses if counterparties are not able to fulfill their obligations at the maturity date. In order to prevent investments from significant credit risk concentration, the Bank sets up the upper credit tolerance limits for investment in stocks by industries and conglomerates. Bond investments are primarily composed of government bonds, financial bonds, and investment-grade corporate bonds. Each corporate bond is reviewed individually to control the credit risk.

Counterparties in the Bank's derivative financial instrument transactions are all financial institutions with good credit ratings. The Bank controls credit exposures of its counterparties by giving different risk limits to different counterparties based on their credit ratings.

The credit risk amounts stated below are for those with positive fair values as of the balance sheet date and those contracts with off-balance sheet commitments and guarantees.

For all financial instruments held by the Bank, the maximum credit exposures are as follows:

	December 31, 2006			
Financial instruments	Book value			Maximum dit exposure
Non-derivative financial instruments				
Financial assets for trading purpose				
Bonds	\$	7,086,877	\$	7,086,877
Beneficiary certificates		207,404		207,404
Other marketable securities		451,056		451,056
Financial assets designated for trading purpose				
Bonds		29,176,986		29,176,986
Available-for-sale financial assets				
Bonds		72,996,969		72,996,969
Short-term bills		443,788		443,788
Beneficiary securities		244,955		244,955
Held-to-maturity financial assets		213,747,427		213,747,427
Bills discounted and loans		972,044,580		972,044,580
Derivative financial instruments				
Non-hedging purpose				
FX contracts (swaps and forwards)		623,245		623,245
FX margin trading		228,403		228,403
Non-delivery forwards		74,462		74,462
FX options held		50,925		50,925
Interest rate swaptions held		7,066		7,066
Bond options held		14		14
Cross currency swaps contracts (excluding the notional principal)		211,324		211,324
Interest rate related contracts (interest rate swaps and asset				
swaps excluding the principal of bonds)		1,910,887		1,910,887
Futures margin trading (note 1)		120,104		120,104
Hedging purpose				
Interest rate related contracts (interest rate swaps and asset				
swaps excluding the principal of bonds)		4,688		4,688
Off-balance sheet commitments and guarantees		-		135,960,316

note 1: It is the excess margin deposits that the Bank paid for before it started to engage in futures trading. note 2: The maximum credit exposure of derivative instruments stated is for those with positive fair values.

The credit exposure amounts stated above are for those with positive fair values as of the balance sheet date and those contracts with off-balance sheet commitments and guarantees. There will be a significant concentration of credit risk when the counterparty of the financial instruments is highly concentrated in a single customer or a group of counterparties who engage mostly in similar business activities with similar economic nature, and such business activities make their abilities to fulfill the contractual obligations influenced similarly by the economic affairs or other situations. The Bank does not engage in transactions that are concentrated significantly in a single customer or counterparty. However, the information on concentrations of credit risks, which represents up to 5% of the Bank's loans, bills discounted, and non-accrual loans is classified below by counterparties and regions:

	December 31, 2006					
Loans by industries	Book value		cre	Maximum edit exposure

Total	\$	898,700,220	\$	898,700,220		

(c) Liquidity risk

Stocks traded by the Bank are all listed on the Taiwan Stock Exchange or the OTC Securities Market. Thus, these stocks have high liquidity and are expected to be sold at fair value promptly when needed. Bonds that the Bank holds are primary government bonds, and their liquidity is within an acceptable range. As a result, the Bank does not have significant liquidity risk.

For the derivative financial instruments held by the Bank, all positions have an active market and high liquidity (except for those financial bonds issued by the Bank and structured with interest rate swap contracts, which have no need for further swaps). Thus, there is no significant concern for liquidity risk.

The liquid reserve ratio for the Bank was 27.2%. In addition, the Bank's capital and working capital were sufficient to fulfill all obligations. Thus, there was no material liquidity risk that the Bank may fail to meet the obligation.

(d) Cash flow risk and fair value risk arising from changes in interest rates

In order to stabilize the long-term profitability and maintain the business growth, the Bank sets a certain interval for each interest-rate-sensitivity indicator.

As of December 31, 2006, the effective interest rates of main currencies for financial instruments (except financial assets at fair value through profit and loss) held or issued by the Bank are as follows:

	December 31, 2006					
Financial instruments	NTD	USD	SGD	CAD	HKD	
Available-for-sale financial assets						
Government bonds	2.22%	4.85%	-	-	4.23%	
Corporate bonds	1.93%	5.88%	3.23%	-	-	
Short-term bills	-	5.16%	-	4.34%	-	
Held-to-maturity financial assets						
Government bonds	-	4.92%	-	-	-	
Corporate bonds	2.08%	5.31%	-	-	-	
Loans and advances						
Short-term loans	3.10%	6.15%	-	-	-	
Mid-term loans	2.89%	5.72%	-	-	-	
Long-term loans	3.11%	6.01%	-	-	-	
Financial bonds	3.53%	-	-	-	-	
Deposits	1.14%	3.25%	-	-	-	

(2) Credit transactions with related parties as borrowers or guarantors

•	•

Real estate	1,072,777
Total	\$ 224,517,424

(6) Capital adequacy ratio

	December 31, 2006		December 31, 2005	
Net eligible capital	\$	98,744,145	\$	86,948,194
Total risk-weighted assets		897,352,036		849,285,387
Capital adequacy ratio (%)		11.00		10.24
Tier one capital / Total risk-weighted assets (%)		8.38		8.33
Tier two capital / Total risk-weighted assets (%)		3.56		2.92
Tier three capital / Total risk-weighted assets (%)		-		-
Shareholders' equity / Total assets (%)		5.54		5.12

- note: 1. Capital adequacy ratio = net eligible capital / total risk-weighted assets
 - 2. Total assets are the amounts recognized on balance sheet.
 - 3. As of December 31, 2006 and 2005, the consolidated capital adequacy ratio was 11.01% and 10.29%,

(7)

respectively.	
Extraordinary items	
The Chairman or employee was charged by the prosecutors for violating regulations in business operation in recent year. (note 1)	None
A civil fine was imposed by the Financial Supervisory Commission, Executive Yuan, for violation of regulations in recent year. (note 2)	None
Recommendation for corrective action was made by the Financial Supervisory Commission, Executive Yuan, for significant internal control deficiency in recent year.	Examiner reviewed the savings and remittance business of the OO Branch in overseas and found that the Branch handled outward remittance operation based on clients' remittance application forms which duly signed and with a note stating fund to be collected by debiting savings account, but no other certificates requested from the clients. In addition, the remittance application forms were not signed by counter staff, but only verified and reexamined by one supervisor OO. That indicates the Branch's internal control is ineffective, which may result in improper practice. This deficiency was strictly recommended by the government regulator to be rectified. However, according to the local banking practice and the Account-Opening Agreement of the Branch, the current account is available for fund withdrawal by check, and the Branch is allowed to debit the account as instructed in the remittance application form presented by the depositor or by any authorized signature party to effect remittance or to transfer fund. This type of transaction process does not violate the local financial regulations. As to the counter staff's signatures missed in the remittance application forms, the staff in charge has amended them accordingly, and the Branch is ordered to manage internal control system properly and effectively in the future.
Losses incurred over NT\$50 million individually or in aggregate due to employee fraud, major incident, or damage from not in compliance with "Safety	None

note 1: "Recent year" means the year before the disclosure date.

note 2: It represents that the fine is imposed by the Banking Bureau, the Securities and Futures Bureau or the Insurance Bureau, Financial Supervisory Commission, Executive Yuan.

None

(8) Financial statements presentation

recent year. Others

Standards set forth in Financial Institutions" in

According to the "Guidelines Governing the Preparation of Financial Reports by Public Banks", certain accounts of 2005 financial statements have been reclassified to conform to the presentation of the 2006 financial statements.
